

# Skyports Infrastructure

## MEDIA KIT

### About

Formed in 2018, Skyports is a leading developer, operator and service provider for the Advanced Air Mobility (AAM) industry. Skyports is driven by a vision to enable society to enjoy a safer, happier, wealthier existence by improving connectivity to people and goods through the provision of AAM infrastructure and drone services, whilst protecting the planet for future generations.

Skyports Infrastructure is the leading enabler of Advanced Air Mobility (AAM), providing the critical link between the ground and the sky. The company designs, builds and operates take-off and landing infrastructure for air taxis, and partners with world-class electric vertical take-off and landing (eVTOL) vehicle manufacturers to enable safe, sustainable and efficient cargo and passenger flight operations within urban and suburban environments.
